HABITAT CONSERVATION PLAN STEERING COMMITTEE
CHAired BY THE COUNTY OF SAN MATEO

VOLUME ONE

PREFACE

San Bruno Mountain Area Conservation Plan (HCP or Plan) is a way to preserve and enhance habitat for an endangered species, the Mission Blue butterfly, in conjunction with limited development on San Bruno Mountain. Volume I includes a historical review of the area, the biological principles, and the institutional arrangement for the Plan operations. Volume II details a specific plan for each of the parcels of land on the Mountain. The biological research done by Thomas Reid Associates on San Bruno Mountain is described in a separate document.

The Habitat Conservation Plan and the Biological Study are supporting documents for a permit under Section 10(a) of the Endangered Species Act (1973). The permit would allow limited taking of endangered species in accordance with the Plan. The Plan was developed under the guidance of the San Bruno Mountain Steering Committee, representing San Mateo County, Daly City, South San Francisco, and Brisbane planners and policy makers; landowners and developers; biologists; United States Fish and Wildlife Service; California Department of Fish and Game and the Save San Bruno Mountain Committee.

The Section 10(a) permit and the Habitat Conservation Plan will be the subject of State and Federal environmental documents. If you wish to comment on the scope of the environmental documents, your comments should be sent to the following address by June 12, 1982:

Mr. William Rozar
San Mateo County Planning Division
